@weirdos: I am happy to announce that the *Weirdos* have officially partnered with **Arcade**, creators of the *Apes vs. Mutants* mobile game, and will be a launch partner in their interoperable Metaverse 🌈👾👾

- Weirdos* will be able to play as their *Weirdo* in-game and live in the many biomes of the **Arcade** Metaverse
- Fight alongside or against other NFT projects such as Karafurus or MFers
- Own and customize your own land in-game

I can't wait to see you all in **Arcade** and take down some of these other projects as our little *Weirdo* army. Next week we will hold a raffle for land in the **Arcade** Metaverse.

P.S. this isn't the only gaming-related announcement we have for ya' 🌟

Also - **Arcade** is fully mobile so everyone can play! (edited)
